

## Analysis

The following presents an analysis of the Red Hen Rapid Annotator (<http://cluos.ikw.uos.de:8008/home/>).

[illegible]

Cosmetic problems:

1. text should be written with an upper-case T.
2. Rapid Annotator Icon and Text are too close.

| Index | User | Role | Message | Status |
|-------|------|------|---------|--------|
|-------|------|------|---------|--------|

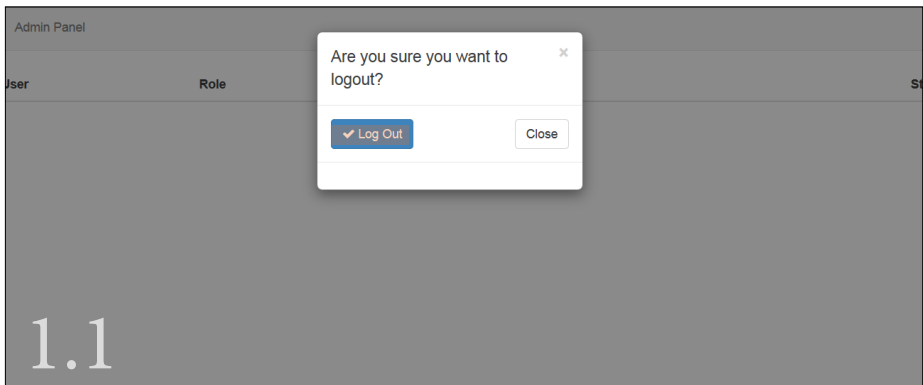

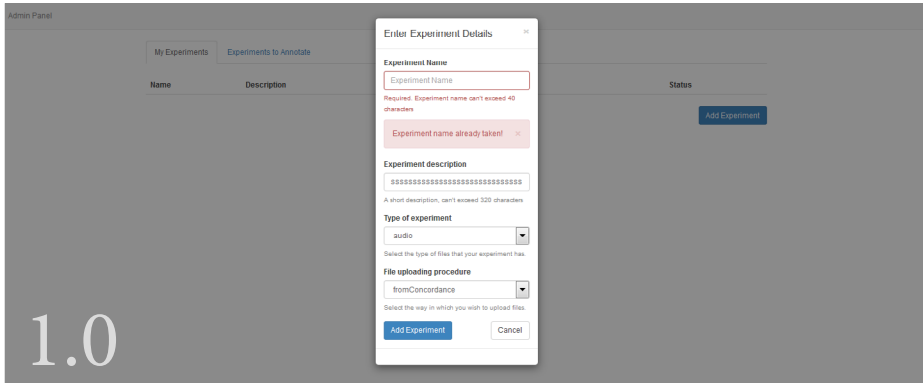

Cosmetic problems:

1. line should have the same height as state 0.2.

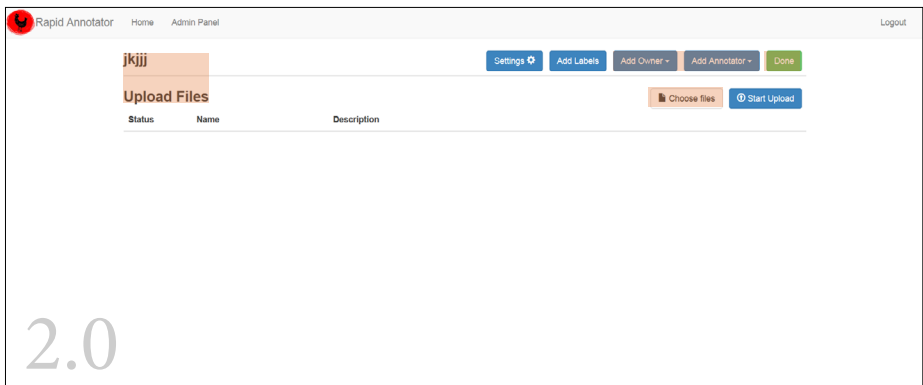

Cosmetic problems:

1. Requirement text has a too big line spacing .
2. Experiment description input field should be a text block field.

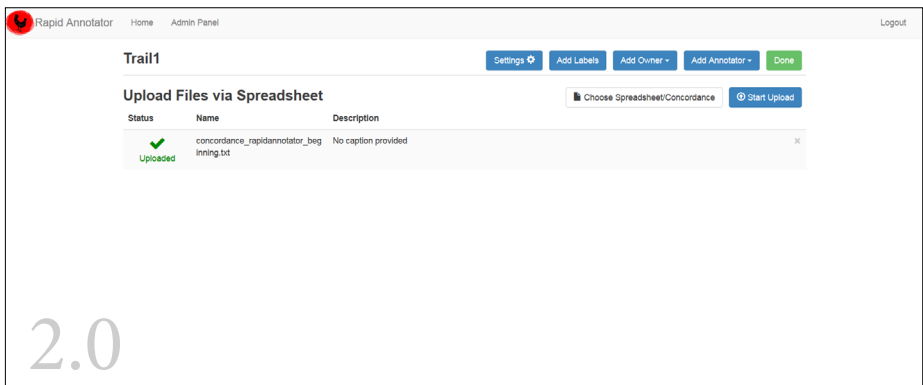

Cosmetic problems:

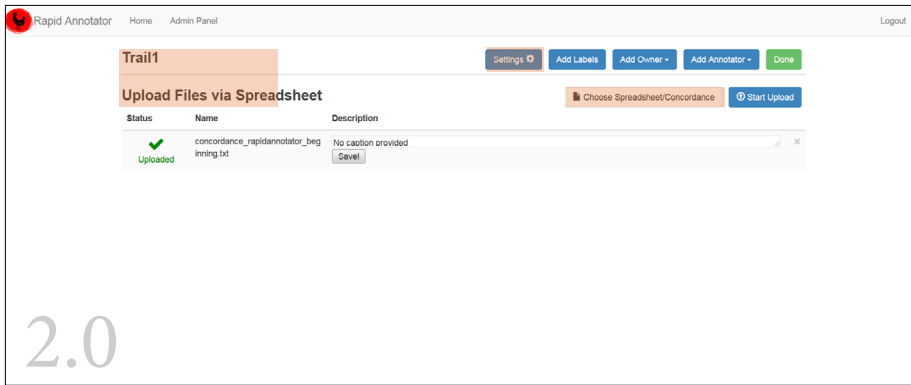

1. Check-Icon AND Log Out Text not necessary

Potential User Problems:

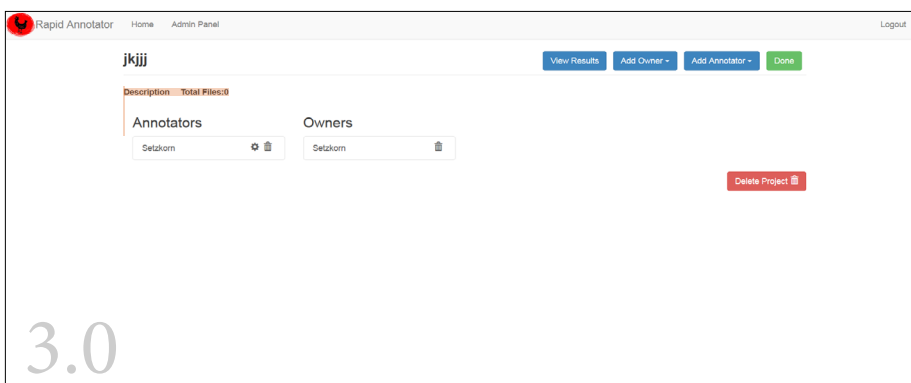

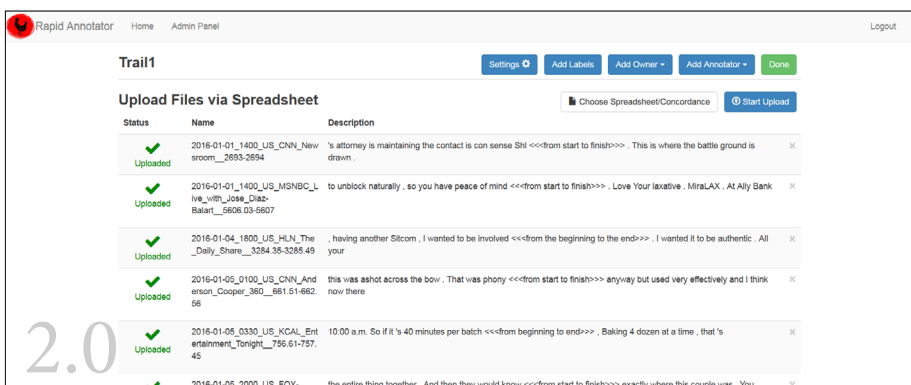

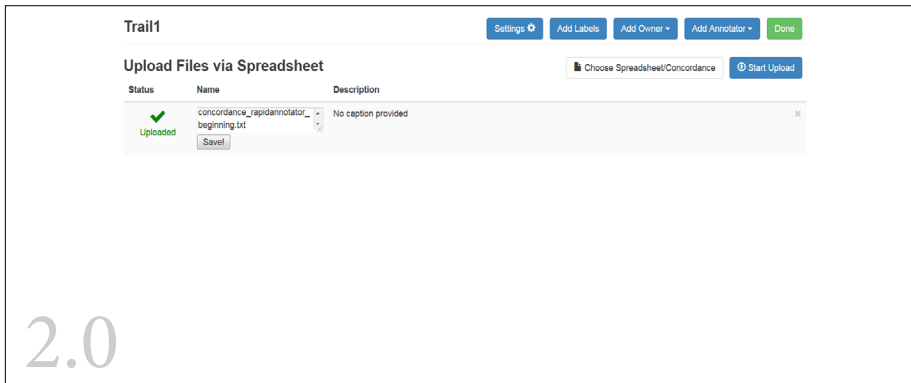

1. The interactivity of Add owner and add annotator is not obvious. A feedback is necessary. Also annotator und owner could be a constantly present information.
2. A warning if the state is left without saving, could be included.
3. Start Upload gives no feedback. It seems like the data is uploaded automatically.
5. A feedback about the progress of the upload is missing.
6. There is no possibility to rename the file afterwards/in the process.
7. Description and Name should be changeable without a save button. A click outside the box could be also sufficient.

Cosmetic problems:

1. *Choose Files* should be colored blue.
- The color distinction is not resembling a logic distinction
2. The project name and *Upload files* have the same font size, although there is a distinction in their hierarchy.
3. The icons and their text is not centered (see settings and gear icon)
4. The use of icons is not consistent.
5. *Name* and *description* window are too close if the *name* box entails a long text.

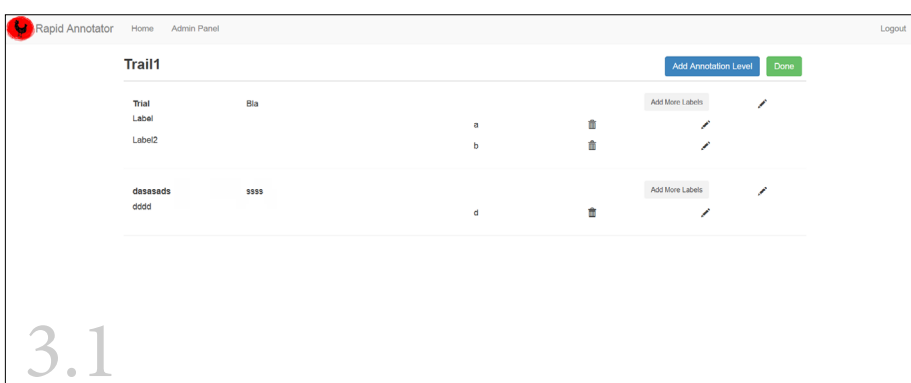

Cosmetic problems:

1. *Annotators* should be aligned to the left border
2. *Description* and *Total files* should have a smaller font size.

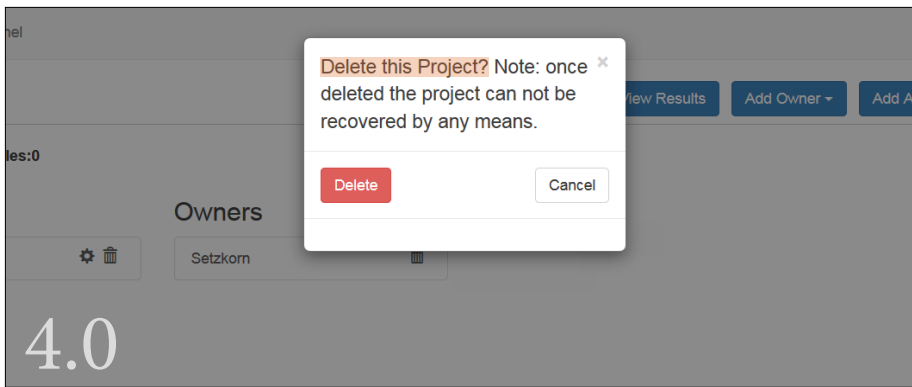

Potential User problem:

1. *Delete Project* should occur on state 0.0, for example as an icon.

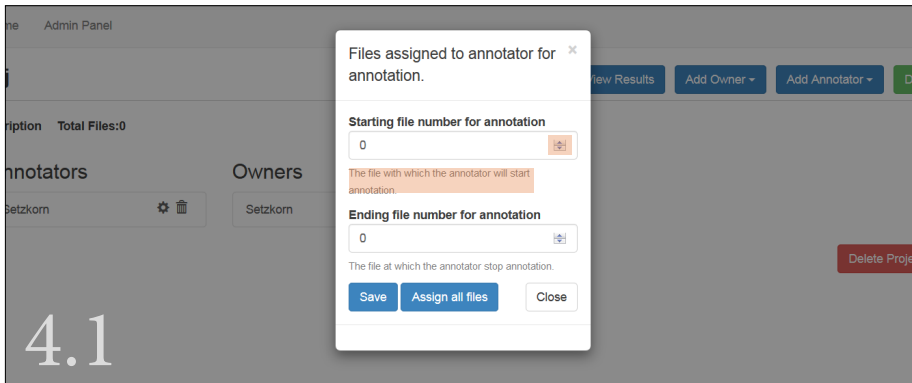

Cosmetic problems:

1. Description line is missing (compare 2.0)
2. *Add more labels* button should be placed under the list
3. Icons are not aligned.
4. The icons should change their status with a mouseover.
5. *Add Annotation Level* and *Done* should be placed below

Cosmetic problems:

1. A paragraph after Note would be useful or highlighting *Delete this project* as headline.

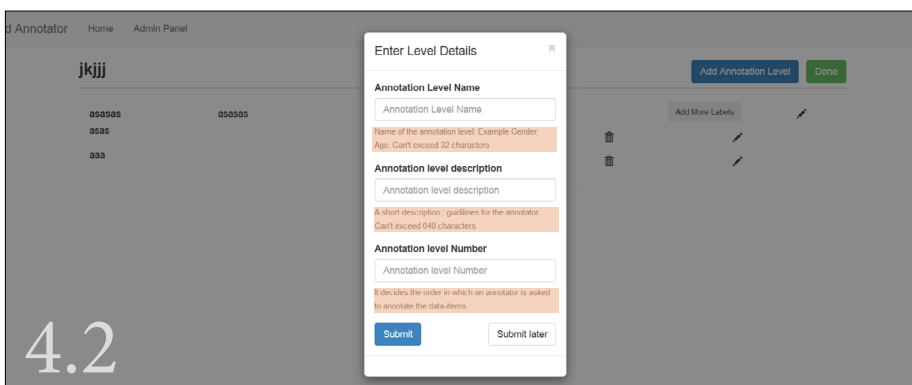

Potential user problem:

1. Buttons are not usable.
2. The window seems not too operate as it should.

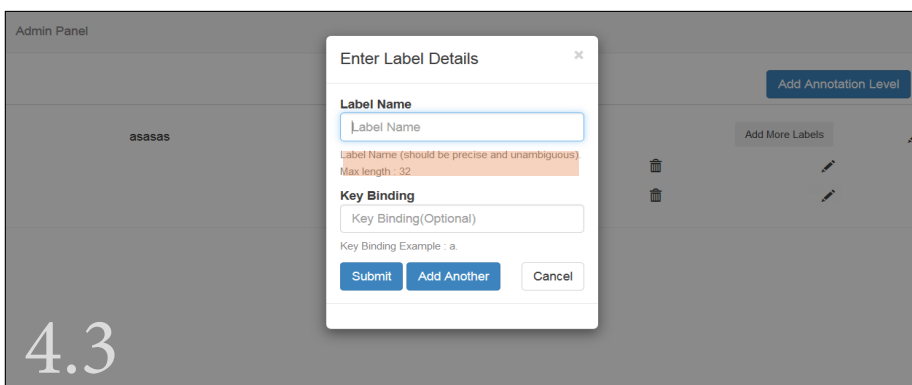

Cosmetic problems:

1. Text has a too big line spacing

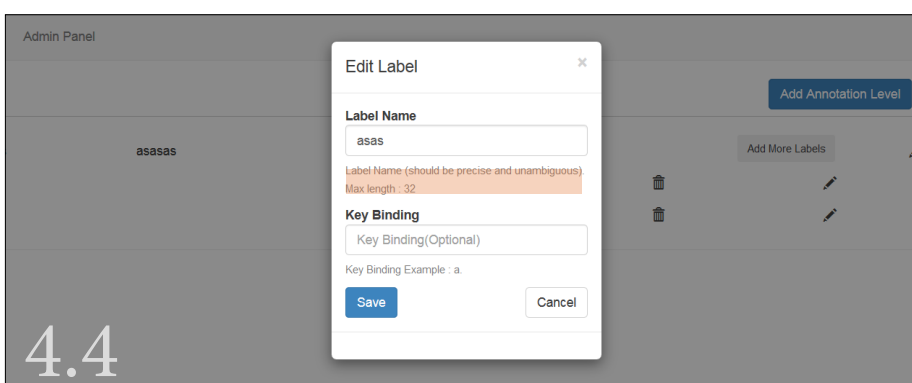

Cosmetic problems:

1. Text has a too big line spacing
2. Format of the error message is not consistent (compare state 1.0).

Cosmetic problems:

1. Text has a too big line spacing

Cosmetic problems:

1. Text has a too big line spacing
